PROFESSIONAL SUMMARY

Senior Java Developer with 6.5 years of experience building and running Spring Boot microservices for payments and lending products. Comfortable owning a service from design to production support. Looking for a delivery role with more architecture involvement.

WORK EXPERIENCE

Senior Java Developer, Cobalt Digital, Noida *Feb 2023 – Present*

- Lead developer for the payment reconciliation service, processing about 1.2 million transactions a day.
- Designed event driven flows between six microservices and added retries and idempotency for failed settlements.
- Reduced p95 latency of the settlement API from 900 ms to 310 ms by fixing N+1 queries and adding Redis caching.
- Review pull requests and mentor two junior developers.

Java Developer, Brightpath Solutions, Noida *May 2020 – Feb 2023*

- Built REST APIs in Spring Boot for a loan origination platform used by 40+ partner branches.
- Moved a monolithic repayment module to three independent microservices, cutting release time from two weeks to two days.
- Wrote JUnit and Mockito tests that raised coverage on owned modules from 48% to 82%.

EDUCATION

- B.Tech, Computer Science, Jaypee Institute of Information Technology, Noida, 2020 (8.1 CGPA)

SKILLS

Java 8/11/17, Spring Boot, Spring Security, Microservices, REST APIs, Hibernate/JPA, MySQL, PostgreSQL, Redis, JUnit, Mockito, Git, Jenkins, Docker

CERTIFICATIONS

- Oracle Certified Professional, Java SE 11 Developer
