Solution Architect, Enterprise Java and Cloud

PROFILE

Technology leader with 14 years in enterprise Java, the last eight as lead developer and architect. Experience defining reference architectures, running design reviews, estimating programmes and managing offshore teams of up to 22 engineers. Hands-on when needed, but increasingly focused on architecture, governance and hiring.

CORE COMPETENCIES

Java	J2EE	Spring Boot
Spring Cloud	Microservices	REST APIs
Apache Kafka	AWS	Docker
Kubernetes	Oracle	PostgreSQL
MongoDB	Domain Driven Design	Solution Architecture
Jenkins	SonarQube	

PROFESSIONAL EXPERIENCE

Solution Architect, Nimbus Works, Bengaluru — **April 2022 – Present**

- Architect for a core banking modernisation programme with 60 engineers across five teams.
- Authored target state architecture, integration patterns and non-functional requirements.
- Chair the weekly architecture review board and approve all external integrations.
- Built a proof of concept for event sourcing on Kafka that was adopted for the payments domain.
- Present architecture and risk updates to the client CIO office every month.
- Coach tech leads on domain driven design and resilience patterns.

Technical Lead, Vertex Commerce, Bengaluru — **September 2018 – April 2022**

- Technical lead for a marketplace platform serving 3 million monthly users.
- Broke the checkout monolith into services, with Kafka as the backbone for order events.
- Moved the platform to AWS (ECS, RDS, S3, CloudWatch) and cut hosting cost by 27%.
- Defined API standards, versioning rules and a shared error contract for 18 services.
- Ran quarterly load tests and capacity planning before festival season sales.
- Managed a team of 14 across Bengaluru and Pune.

Senior Software Engineer, Zenith Cloudworks, Bengaluru — **June 2015 – September 2018**

- Moved a claims engine from EJB to Spring and Hibernate, retiring an application server licence.
- Designed the first REST API layer for the claims engine, used later by mobile and partner apps.
- Led a team of 7 through two major releases without a severity 1 defect in production.
- Introduced code review checklists and SonarQube gates across four teams.
- Interviewed and hired 11 engineers over three years.

Software Engineer, Orbit Logic, Chennai **November 2012 – June 2015**

- Developed Struts and Spring MVC modules for a retail banking portal.
- Wrote Oracle stored procedures and tuned long running reports.
- Handled L3 production support and weekend releases for two years.
- Moved the team build from Ant to Maven and introduced nightly builds.

KEY ACHIEVEMENTS

- Led the migration of a 1.1 million line claims engine from EJB to Spring Boot services with no unplanned downtime across 9 production cutovers.
- Defined a reference architecture adopted by 5 delivery teams; onboarding time for new services dropped from 6 weeks to 10 days.
- Saved about 1.4 crore a year in hosting and licence cost across two programmes through right sizing and server consolidation.
- Introduced contract testing and consumer driven API reviews, reducing integration defects found in UAT by 45%.
- Built and mentored a group of 6 tech leads, 4 of whom were promoted within two years.
- Delivered a payments proof of concept on Kafka in 5 weeks that moved into production the following quarter.
- Presented the programme architecture to the client board and secured a 12 month extension worth 18 crore.

TALKS AND WRITING

- Speaker, internal engineering summit 2024: Evolving a monolith without a rewrite.
- Speaker, Bengaluru Java user group 2023: Failure handling in event driven payments.
- Author, internal engineering blog: 14 posts on API design, resilience and cost control.

PROGRAMME EXPERIENCE

- Core banking modernisation (2022 to date): 60 engineers, 5 teams, 3 integration vendors, 14 month first phase.
- Marketplace re-platforming (2019 to 2022): 14 engineers, 18 services, 3 million monthly users.
- Claims engine rewrite (2015 to 2018): 7 engineers, 2 major releases, 4 regional rollouts.

EDUCATION

- M.Tech, Software Engineering, BITS Pilani (work integrated programme), 2017
- B.E., Computer Science, Anna University, Chennai, 2012 (First class)

CERTIFICATIONS

- AWS Certified Solutions Architect, Associate
- TOGAF 9 Foundation
- Oracle Certified Professional, Java SE 8

PERSONAL DETAILS

Date of Birth: 14 July 1990

Marital Status: Married

Nationality: Indian

ADDITIONAL INFORMATION

Notice Period: 90 days (buyout possible)

Current CTC: 42 LPA, Expected: 48 LPA
